Webpack, Gulp, Grunt, Task R...

HTML & CSS

## PROFILE

**I solve problems with words and code.**

Front End software developer with strong industry experience and a core background in web development, JavaScript, ReactJS, VueJS, jQuery, HTML5, CSS3, SCSS/SASS and agile philosophies.

## EMPLOYMENT HISTORY

### Head Of Frontend, VSWare

Dublin

Mar 2016 – Present

- Plan, design and build features within a monolithic Vue SPA using VueJS, git, SCSS, yarn and webpack.
- Create a stable development environment for a Vue SPA within VSWare(Webpack 4, Vue config, vue-cli, npm, lerna)
- Migrate core architecture from a jQuery monolithic application to a micro service based approach using Lerna, npm and Artifactory.
- Design and develop multiple mobile solutions for VSWare including a React Native and a PWA approach.
- Mentor, manage and guide Junior and intermediate frontend developers in personal growth and manage frontend developers directly in sprints for feature releases.
- Work with PO's, BA's, customers and other developers in a Agile environment(Kanban) to deliver features successfully.

### Frontend Developer, Software Design

Dublin

Mar 2015 – Mar 2016

- Wordpress Development(Including developing the current skeleton template used for all projects -> Gulp, Bower, npm, PHP & vanilla JavaScript)
- Managing internal servers for various websites(Ubuntu(Nginx, Apache, MYSQL)
- Back End Development(PHP, Python, Npm, Node)
- Front End Development(Javascript, JQuery, HTML, CSS, SASS/SCSS)
- Using Git & designing current workflow structure for version control of all projects.

git

Jenkins / Travis / Drone / CI

AWS
